# Bioresource Processing Alliance

- How we are funded
- Our main aims
- How we will achieve these
- Expertise and equipment
- Connecting people

# BPA – AgR Example 1

agresearch

- **Waste/co-product stream:**
  - Animal waste prior to rendering
- **Problems to solve:**
  - Responding to a growing need in the market
  - Generating a range of higher value products
  - Reduce landfill
  - Reduce chemicals
- **Approach:**
  - Limit plant modifications
- **Progress:**
  - Commercial trials completed
  - Working with multiple processors with varied interests
  - Company investment decisions pending

# BPA – AgR Example 2

- **Waste/co-product stream:**
  - Waste material from meat processors
- **Problems to solve:**
  - Generate high value products
  - Increase milk solid production
  - Reduce landfill
- **Approach:**
  - Secure supply of raw material at suitable sites
- **Progress:**
  - Laboratory work completed
  - Pilot scale process designed

# Frequently asked questions

- Is the BPA a funding organisation for private companies?
- How much funding do I need to put in?
- Who owns the IP?
